

Rules and Sport Shooting Regulations of the ISB International Shooting Association

Regulations for Ordnance or Service Rifles

Version: 2

Authorized by the President of the ISB on 01.06.2021

International rules for
Ordnance or Service Rifles

Page 1 of 4

V2, 01.06.2021

1. General information:

The specifications of each discipline are stated in the Shooting Rules of each shooting category.

The "International Shooting Regulations" "ISchO" of the ISB are to be consulted for all activities and competitions.

2. Firearms:

Weapon type: Ordnance or Service Rifles were officially introduced in the Army with semi-automatic function or with manual repeating system; all models and types which were introduced for a military force up to 1945 and were purchased in a minimum quantity of 1,000 pieces are permitted for this type of shooting sport.

Furthermore, rifles adapted for an army after 1945 are also permitted, which correspond to the original in system and appearance, such as K98k in .308 for Israel, K98k in 30-06 and .308 for Norway, Lee- Enfield in .308, M48 from Yugoslavia, etc.

Barrel length: according to the original

Caliber: only calibers originally used for these weapons from 6 mm upwards, i.e. only officially used calibers.

Trigger: original trigger with at least 1 kg trigger weight

Sight: original sight which was used until 1945, rear sight and front sight or dioptre for weapons where it was fitted as standard.

Condition: basically standard (out of the box), only identical spare parts may be used which do not have any advantage over the standard model.

Due to the age and decades of use of the ordnance weapons and the resulting wear and tear, it is permissible to have the barrel replaced by a new barrel which corresponds to the original barrel in shape, dimensions and calibre.

Valid proof of the weapon must be available, no technical defects.

3. Ammunition:

Only metal cartridges with nitro powder and commercially available bullets with the ballistic performance corresponding to the caliber are allowed to be used. Factory ammunition or hand-loaded cartridges according to the CIP standard are permitted, reduced loads are prohibited.

4. Equipment:

According to ISchO 3.2.10. every shooter und every person present on the shooting range has to wear ear and eye protection.

Additional equipment: Extra magazines or clips for guns, which have less capacity than shots required for the discipline.

The shooter has to reload his weapon independently during the discipline if the magazine capacity of the used weapon has less shot than are necessary for that discipline. The time used for the reload will be added to the overall time for that discipline.

5. Safety regulations:

According to ISchO 3.2. till 3.2.10.

6. Shooting positions:

The required shooting positions must be proclaimed in the announcement of the competition for every single discipline. The organizer of the event can choose from the following shooting positions:

- "Sitting" according ISchO 7.1.
- "Sitting Free" according ISchO 7.2.
- "Standing Free" according ISchO 7.4.
- "Prone" according ISchO 7.5.
- "Prone Free" according ISchO 7.6.
- "Kneeling" according ISchO 7.7.
- "Kneeling Free" according ISchO 7.8.

7. Disciplines:

Every shooter must shoot at least 2 series in every discipline during a competition, evaluation according to deck series. Unlimited rebuy.

Every shooter must shoot 5 series in every discipline during a championship, evaluation according to deck series. No rebuy.

The organizer of the event can choose the disciplines.

All disciplines have to be proclaimed and explained in the announcement of the competition.

The organizer of the event can choose one or more disciplines for that competition. The shooters don't have to participate in all disciplines.

Evaluation and award ceremony are held for each discipline itself.

All distances are in meters.
